International Journal of Mass Spectrometry 212 (2001) v–ix

International Journal of Mass Spectrometry

CONTENTS

Special Issue: Dedicated to R. Graham Cooks

Introduction xi

Foreword xiii

Ionic Lament
Kenneth L. Busch xv

Professor R. Graham Cooks: Curriculum vitae xvii

Analytical chemistry

The science of chemical analysis and the technique of mass spectrometry
Christie G. Enke (Albuquerque, NM, USA) 1

Instrumentation

Design of a new electrospray ion mobility mass spectrometer
Thomas Wyttenbach, Paul R. Kemper, and Michael T. Bowers (Santa Barbara, CA, USA) 13

Design, optimization and initial performance of a toroidal rf ion trap mass spectrometer
Stephen A. Lammert (Oak Ridge, TN, USA), Wolfgang R. Plass (West Lafayette, IN, USA), Cyril V. Thompson, and Marcus B. Wise (Oak Ridge, TN, USA) 25

Microscale detection of polychlorinated biphenyls using two-step laser mass spectrometry
Tania B. Mahajan, Upal Ghosh, Richard N. Zare, and Richard G. Luthy (Stanford, CA, USA) 41

Use of an ion guide collision cell to improve the analytical performance of an inductively coupled plasma time-of-flight mass spectrometer
Andrew M. Leach and Gary M. Hieftje (Bloomington, IN, USA) 49

(CONTENTS CONTINUED)

Natural products

A retrospective view of mass spectrometry and natural products—sixty years of progress, with a focus on contributions by R. Graham Cooks
J. Stuart Grossert (Halifax, Nova Scotia, Canada) **65**

Mixture analysis

Tandem mass spectrometric analysis of complex biological mixtures
Fred W. McLafferty (Ithaca, NY, USA) **81**

Mixture analysis by mass spectrometry: Now's the time
R.W. Kondrat (Riverside, CA, USA) **89**

Multidimensional separations of complex peptide mixtures: a combined high-performance liquid chromatography/ion mobility/time-of-flight mass spectrometry approach
Stephen J. Valentine, Manoj Kulchania, Catherine A. Srebalus Barnes, and David E. Clemmer (Bloomington, IN, USA) **97**

Mass spectrometry research in industry

Mass spectrometric analysis of complex mixtures then and now: the impact of linking liquid chromatography and mass spectrometry
Jon D. Williams and David J. Burinsky (Research Triangle Park, NC, USA) **111**

Transformations in pharmaceutical research and development, driven by innovations in multidimensional mass spectrometry-based technologies
Steven H. Hoke II, Kenneth L. Morand, Kenneth D. Greis, Timothy R. Baker (Mason, OH, USA), Kevin L. Harbol (Norwich, NY, USA), and Roy L.M. Dobson (Mason, OH, USA) **135**

Membrane introduction mass spectrometry

Simultaneous detection of volatile, semivolatile organic compounds, and organometallic compounds in both air and water matrices by using membrane introduction mass spectrometry
Todd M. Allen, Mary E. Cisper, Philip H. Hemberger, and Charles W. Wilkerson Jr. (Los Alamos, NM, USA) **197**

Application of the numerical model describing analyte permeation through hollow fiber membranes into vacuum for determination of permeation parameters of organic compounds in a silicone membrane
Alexey A. Sysoev (Moscow, Russia), Raimo A. Ketola, Ismo Mattila, Virpi Tarkiainen, and Tapio Kotiaho (Espoo, Finland) **205**

Charge permutation reactions

Charge permutation reactions in beam type mass spectrometers
Allison S. Danell and Gary L. Glish (Chapel Hill, NC, USA) **219**

(CONTENTS CONTINUED)

Internal energy distribution in charge inversion mass spectrometry using alkali metal targets
Shigeo Hayakawa (Osaka, Japan) 229

Charge-stripping of anions in the gas phase: the formation of interesting neutrals and cations
John H. Bowie (Adelaide, South Australia, Australia) 249

Clusters/kinetic method

Mass spectrometric determination of the surface compositions of ethanol–water mixtures
G. Raina, G.U. Kulkarni, and C.N.R. Rao (Bangalor, India) 267

A new time-of-flight gating method for analyzing kinetic energy release in Coulomb exploded clusters: application to water clusters
Eric S. Wisniewski, Jason R. Stairs, A. Welford Castleman, Jr. (University Park, PA, USA) 273

The role of proton affinity, acidity, and electrostatics on the stability of neutral versus ion-pair forms of molecular dimers
Eric F. Strittmatter and Evan R. Williams (Berkeley, CA, USA) 287

Relative and absolute bond dissociation energies of sodium cation complexes determined using competitive collision-induced dissociation of experiments
Jay C. Amicangelo and P.B. Armentrout (Salt Lake City, UT, USA) 301

Competitive ligand losses in mono- and dicationic $L'FeL^{+/2+}$ complexes (L', L = arene): structural insight and charge-state dependent reversals of branching ratios
Detlef Schröder, Katrin Schroeter, and Helmut Schwarz (Berlin, Germany) 327

Ion trap mass spectrometry

A survey of recent research activity in quarupole ion trap mass spectrometry
Chunyan Hao and Raymond E. March (Peterborough, Ontario, Canada) 337

Gaseous apomyoglobin ion dissociation in a quadrupole ion trap: $[M + 2H]^{2+} - [M + 21H]^{21+}$
Kelly A. Newton, Paul A. Chrisman, Gavin E. Reid, J. Mitchell Wells, and Scott A. McLuckey (West Lafayette, IN, USA) 359

Ion trap tandem mass spectrometry of intact GTP-binding protein γ-subunits
Kevin L. Schey, Lana A. Cook, and John D. Hildebrandt (Charleston, South Carolina, USA) 377

Determination of alkali metal cation selectivities of debenzo-16-crown-5 lariat ethers with ether pendant groups by using electrospray ionization quadrupole ion trap mass spectrometry
Sheldon Williams, Sheryl M. Blair, Jennifer S. Brodbelt (Austin, TX, USA), Xiaowu Huang, and Richard A. Bartsch (Lubbock, TX, USA) 389

(CONTENTS CONTINUED)

Ion structures

Discovery and characterization of atmospherically relevant inorganic species by structurally diagnostic mass spectrometric techniques
Fulvio Cacace (Rome, Italy) **403**

Gas-phase ion chemistry

The crossed-beam scattering method in studies of ion-molecule reaction dynamics
Zdenek Herman (Boulder, CO, USA) **413**

Cyclization of acylium ions with nitriles: gas-phase synthesis and characterization of 1,3,5-oxadiazinium ions
Eduardo C. Meurer, Luiz Alberto B. Moraes, and Marcos N. Eberlin (Campinas, Brazil) **445**

Examination of barriered and barrierless hydrogen atom abstraction reactions by organic radical cations: the cytosine radical cation
Jason M. Price, Christopher J. Petzold, H.C. Michelle Byrd, and Hilkka I. Kenttämaa (West Lafayette, IN, USA) **455**

Desorption ionization/processes

Molecular desorption and secondary ion mass spectrometry
Nicholas Winograd and Barbara J. Garrison (University Park, PA, USA) **467**

Sputtering of condensed polyatomic gases by kilo-electron-volt-energy ions
Donald E. David, V. Balaji, Josef Michl (Boulder, CO, USA), and Herbert M. Urbassek (Kaiserslautern, Germany) **477**

Inelastic ion-surface collisions: scattering and dissociation of low energy benzene molecular cations
Helen L. de Clercq, Atish D. Sen, Anil K. Shukla, and Jean H. Futrell (Newark, DE, USA) **491**

The renaissance of desorption chemical ionization mass spectrometry: characterization of large involatile molecules and nonpolar polymers
Marco Vincenti (Torino, Italy) **505**

Surface-induced dissociation

Optimization of a matrix-assisted laser desorption ionization-ion mobility-surface-induced dissociation-orthogonal-time-of-flight mass spectrometer: simultaneous acquisition of multiple correlated MS^1 and MS^2 spectra
Earle G. Stone, Kent J. Gillig, Brandon T. Ruotolo, and David H. Russell (College Station, TX, USA) **519**

Implementation of low-energy surface-induced dissociation (eV SID) and high-energy collision-induced dissociation (keV CID) in a linear sector-TOF hybrid tandem mass spectrometer
Eugene N. Nikolaev, Árpád Somogyi, Darrin L. Smith, Chungang Gu, Vicki H. Wysocki (Tucson, AZ, USA), Charles D. Martin, and Gary L. Samuelson (Peabody, MA, USA) **535**
